

# MDL IMMUNITY PROTOCOL

**Strengthen Your Immune System and  
Reduce Inflammation**

Your immune system is under constant attack from environmental toxins—heavy metals, microplastics, and harmful proteins—that accumulate in the body and disrupt immune function. These toxic exposures contribute to chronic inflammation, autoimmune dysfunction, and increased susceptibility to long-term illness.

MDL Immunity PlasmaXchange is a proactive, physician-led protocol designed to support immune balance, remove toxic burdens, and reset your immune system for optimal health.

## WHY DETOXIFICATION IS CRITICAL FOR IMMUNE HEALTH

**Toxins are the single greatest burden on your immune system.** Every day, pollutants from food, water, air, and household products overload the body with harmful substances, weakening immune defenses and increasing inflammation.

Common immune-related symptoms linked to toxin overload:

- ✓ **Frequent infections** or slow recovery from illness
- ✓ **Chronic infections** such as from Lyme, mold, and viruses
- ✓ **Chronic fatigue** and unexplained body aches
- ✓ **Autoimmune flare-ups** and inflammatory conditions
- ✓ **Brain fog, joint pain, and skin conditions**

**Your body is designed to protect and heal itself—but today's toxic environment makes that harder than ever. MDL Immunity PlasmaXchange is a scientifically backed approach** to clearing immune-disrupting toxins, promoting balance, and helping your body function at its best.

## WHAT IS PLASMAXCHANGE?

Therapeutic Plasma Exchange (TPE) is a minimally invasive procedure that filters toxins, inflammatory proteins, and autoantibodies from the bloodstream—removing immune stressors and restoring balance.

**At MDLifespan, we enhance the impact of TPE with:**

- ✓ Comprehensive immune diagnostics
- ✓ Personalized detoxification strategies
- ✓ Physician-led, patent-provisioned protocols
- ✓ Targeted IV nutrient therapy for immune resilience

“In my three decades clinical work in environmental toxicology, I have not seen detoxification data this compelling.”

**Lyn Patrick ND**, American Academy of Environmental Medicine
